DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an Examiner's statement of reasons for allowance: Applicant has amended the independent claims to include the limitation of the phase rotator operating under the control of a phase lock loop. Thus, the phase rotator is being interpreted to be an element that is separate from the phase lock loop as opposed to an element that is a part of the phase lock loop (See Figure 3 Numbers 54 and 60 and Page 6 Line 21 – Page 7 Line 1). The limitation of using a phase rotator operating under the control of a phase lock loop to convert an asynchronous signal to a synchronous digital parallel data in conjunction with an edge detection is not found in the prior art individually, nor would it have been obvious to combine said prior art to result in the claimed invention.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
